Approved Oils
Volvo Components

Approved Oils, Volvo Components

This bulletin identifies the oil requirements and lists the companies offering oil types and qualities required for Volvo components.

For oil change intervals, refer to Service Bulletin 175-60, "Oil and Filter Change Intervals for Volvo Components".

Note: Failure to follow these recommendations may void any and all applicable engine, transmission and drive line warranties.

Approved Oils, Volvo Engines

Engine Oil Type/Quality

See the engine types for recommended oil change intervals. The intervals do not cover all applications. In on/off highway driving, severe off-highway, continuous stop-and-go city driving and extremely high mileages, the oil change interval needs to be customized for the best protection and economy. Change all oil filters at each oil change.

Synthetic oils do not allow further extension of oil drain intervals. It is the contamination rate (i.e., soot and the depletion of additives) rather than base oil quality that determines the useful engine oil life and therefore the oil change intervals.

Note: Engines meeting the emissions requirements of 2007 and later are designed with exhaust aftertreatment systems requiring a new engine oil quality. This has lead Volvo to require an oil that meets VDS-4 quality standards for model year 2007 and later Volvo engines. The VDS-4 quality standard is based on the newly developed API CJ-4 engine oil specification, but has additional performance requirements essential to adequately protect the Volvo engines at the drain intervals specified. So, all oils listed in this bulletin also meet the API CJ-4 specification. Pre-2007 engines also work better with the above mentioned oils, but are not required.

CAUTION

Extra oil additives must never be added to any oil used.

VDS-4 Approved Engine Oils

Note: All the oils listed in the following table meet the VDS-4 standard. They also meet VDS-2, VDS-3, EO-N Premium Plus and API CJ-4 quality standards. Oil from this list is **REQUIRED** for model year 2007 and later Volvo engines and are recommended for earlier engines.

Supplier	Brand Name	Viscosity Grade
Volvo Truck Corp.	Volvo Diesel Engine Oil VDS-4 ¹	10W-30
	Volvo Diesel Engine Oil VDS-4	15W-40
Volvo Trucks North America	Volvo Premium Motor Oil	15W-40

Approved Oils, Volvo Transmissions

Transmission Oil Type/Quality

 CAUTION
Only use Volvo approved synthetic oil in the I-Shift transmission. Using non-approved transmission oil can result in damage to transmission components.

 CAUTION
Drained I-Shift synthetic oil must NEVER BE REUSED and must be replaced along with the transmission oil filter.

Always use the Volvo approved synthetic oil whenever adding or changing the transmission oil. Always replace the transmission oil filter when the transmission oil is changed.

Only Volvo approved transmission oils should be used in Volvo I-Shift transmissions. At this time, those oils are Castrol Syntrans and ExxonMobil 97307 Spec oils, or synthetic oil meeting 97307 spec.

ExxonMobil 97307 spec oil branded as Volvo Synthetic oil is available for ordering (Volvo Part No. 85111057). The ExxonMobil 97307 spec oil is fully compatible for top off, etc. with the Castrol Syntrans factory fill oil.
