

New EGR engines are much tougher on engine oil – better oils are a must!

EGR vs. No EGR / Oil Degradation

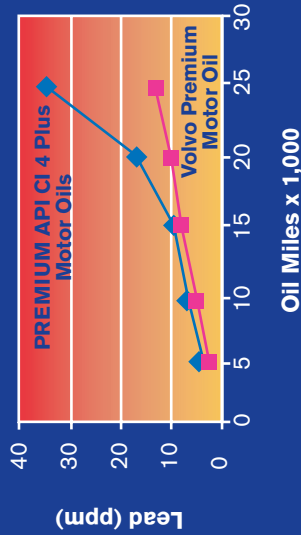

Volvo Premium Motor Oil out-performs the competition in maintaining its viscosity in high-stress conditions

EGR Engine Field Test Lead Content in Used Oil

(Indicates oil's ability to handle soot/abrasive wear from EGR)

Volvo Premium Motor Oil 15W-40 Specifications:

Provides improved soot dispersancy and viscosity control plus minimizes engine soot deposits. Provides trouble-free operation. Field proven under severe conditions. Used as factory fill at Volvo Trucks North America, Inc. U.S. plants.

- Meets Volvo VDS-2 and VDS-3
- Meets Cummins 20078
- Meets or exceeds Global DHD-1 and ACEA E-5
- Exceeds API Service Category CI-4
- Meets Mack® EO-N Premium Plus 2003
- Improved soot dispersancy
- Improved TBN retention
- Exceeds other industry standard tests that determine general and soot-related wear and resistance to oxidation (viscosity change) at high temperatures

Part Number
 VPO240374J
 VPO240374P
 VPO240374D
 VPO240374I
 VPO240374B

Package
 1 Gallon Jug
 5 Gallon Pail
 55 Gallon Drum
 220 Gallon Tote
 Bulk

Volvo Premium 15W-40 Motor Oil

Volvo Trucks, Inc., a leading name in the transportation industry, is also a leading name in lubrication for heavy-duty truck engines. Volvo Premium 15W-40 Motor Oil provides your heavy-duty diesel engine with the most advanced lubrication available in the industry today.

Volvo Premium Motor Oil is specially formulated to deliver maximum protection against soot-induced wear, filter plugging and viscosity change and provide superior oil oxidation. This is the very performance that your emission-controlled engine demands.

This is why Volvo Premium Motor Oil is "highly recommended by Volvo for all Volvo and vendor engines regardless of vintage."

This kind of protection means that you will maximize engine durability and life while lowering maintenance costs.

Volvo Premium Motor Oil is field-tested to ensure it exceeds the rigorous demands of today's high-output diesel engines. That is why Volvo Trucks is a leader in lubricant technology development and in heavy-duty diesel engine lubrication. It's the only reason you need to make Volvo your lubrication choice for carefree service and long-term durability.

Dear Volvo Customer,

Why should you use Volvo Premium 15W-40 Motor Oil in your Volvo truck?

The times are changing, the need to maintain our environment is changing and your Volvo truck has changed and will continue to change to meet new and stricter environmental and quality standards.

EGR and catalytic-type aftertreatment systems make your truck look and behave differently than it did just a few years ago. Many customers realize this and are asking questions about lubricants and coolants – the life-blood of your new Volvo truck engine.

Please consider the following:

The by-products of combustion, i.e., particulates and soot, no longer leave the truck engine through the stack but rather are re-introduced into the combustion chamber by way of the Exhaust Gas Recirculation (EGR) system on your new Volvo truck.

These corrosive by-products are pulled from the cylinder walls after combustion down into your oil where they stay. Your engine is now subject to the higher temperatures of EGR and more soot than ever before.

Volvo Premium Oil is formulated with Chevron Texaco ISO-SYN™ Group II Base Oil for added high temperature performance and contains an additive chemistry specially formulated for Volvo Trucks to protect your engine from soot and deposits.
